

# digiled 5.9mm mini tile

Outdoor LED Panel

The DLPo5.9mm LED Mini Tile System offers designers the ability to integrate seamless corners, curves, and creative shapes into their production and video designs. This innovative product works in conjunction with flexible accessories—including straight or variable angle couplers. The quarter-sized (125x500mm) Mini Tiles work seamlessly with the standard digiLED DLPo5.9mm 500x500mm modules. Paired with digiLED's flexible accessories, the Mini Tiles have mitered corners that allow for the ability to curve in any direction—convex or concave—up to 15 degrees offering a wide variety of extremely versatile creative design possibilities for designers.
